

TerrafirMa

Serious Pick Up Accessories

4x4 Pick Up Range

The Terrafirma range of accessories and equipment has been created to meet the exceptional demands of Pick Up users and enthusiasts. Distributed Internationally through Allmakes 4x4 authorised parts and accessory dealers.

Terrafirma is one of the most recognised 4x4 accessory brands in the World. Terrafirma offers choice, clear product identification and application, ensuring the correct product can be selected from the extensive and increasing range of accessories. To satisfy the diverse requirements of 4x4 Pick Up owners both on and off road, for work and play with practicality and comfort, we have produced an amazing selection of accessories for Pick Ups.

Terrafirma accessories are primarily designed to fit using original or existing mounting points. Only minimal customising may be required with minor trimming or drilling needed to maximise the performance of the vehicle. Trends change and new vehicle models are introduced, as such new products are continually being evaluated and tested for introduction. In this catalogue you will find products from the diverse Terrafirma range providing a 'one stop shop' for Pick Up preparation requirements.

All Terrain Shock Absorbers

A great all rounder, the Terrafirma All Terrain shock is a favourite in any conditions and any environment. From the construction site to the motorway, running light or fully loaded, simply replacing tired old shocks or heading off road, you can't go wrong.

The All Terrain shocks are a tough twin tube design which allows for a large volume of oil for cooler internals and improved protection of working parts. Low pressure nitrogen keeps the oil under pressure which prevents it from foaming and creating cavitation which eventually results in heat build-up and shock fade. Terrafirma All Terrain shocks are built with the largest possible fully welded mounting pins and rubber bushes for maximum strength and durability. Tough enough to handle the punishment of recreational off-roading yet refined to provide a comfortable, well balanced and controlled ride on road. Finished with a high quality deep silver paint to resist corrosion and including the smart Terrafirma All Terrain shock absorber logo, a black rigid plastic dust shield with embossed Terrafirma logo protects the hard-chromed steel shaft.

Brake Hoses

Terrafirma have teamed up with the industry leader Goodridge to produce a full line up of the best quality stainless braided brake lines.

For over 40 years, racers from across the globe have turned to Goodridge for products to out-perform the competition. Drivers, riders and teams have been pushing the limits with Goodridge since 1969. Factory fitted brake lines are usually made of rubber. Even when new, rubber expands under pressure causing a decrease in braking performance and spongy pedal feel. Terrafirma Goodridge brake hoses won't expand under pressure, delivering precise braking when you need it. Every Terrafirma Goodridge brake line is individually 100% pressure tested and guaranteed to be leak free. Terrafirma Goodridge brake lines are corrosion resistant and come with a lifetime guarantee. Every brake line kit is supplied with all fixings required to provide a perfect fit first time, every time!

- Each hose has a PVC protective covering.
- OEM Specification fitting plating with 968 hour salt spray protection.
- UK manufactured and assembled product.
- Eliminates spongy feel.
- Greater braking efficiency.
- Superior resistance to abrasion and corrosion.
- 100% TUV, DOT, ADR and ISO approved.
- Every brake line is 100% pressure tested to 2000 PSI once fully assembled.

Suspension Kits

40mm Lift Comfort Ride

Terrafirma has teamed up with Pedders, World renowned Suspension manufacturers from Australia and now offers a range of Suspension upgrade kits for popular 4x4 pick-ups. Designed to provide a 40mm lift, improve the load carrying performance, ride comfort and appearance which allows for larger diameter tyres to be fitted. The kits are a complete engineered suspension solution for your pick up guaranteed to improve on road and off road handling and capability.

Modern pick ups are fitted with coil over struts and wishbones on the front, their design requires extremely high spring rate coils. To avoid the need for specialist tools and reducing installation time Terrafirma and Pedders offer a pre-assembled, ready to fit 'Ezifit' solution combining Trak Ryder Foam Cell shocks and heavy duty coil springs.

The Trak Ryder Foam Cell technology virtually eliminates shock fade, preventing the oil and nitrogen from mixing, guaranteeing optimum damping control in all conditions.

Electronically Deployable Side Steps

Stylish and practical, they are almost invisible when stowed and automatically deploy when the door is opened giving the perfect step up into the cab, also stowing automatically when the door is closed.

A powerful motor operates the step, opening down and out on die cast precisely machined mechanisms coated in a superior corrosion resistant finish and each step has a 300kg load rating. The steps themselves are a combination of high quality contoured and anodised aluminium extrusion with stylish moulded plastic end caps.

Side Steps

Exterior Styling

Wind Deflectors

Terrafirma Wind Deflectors are useful in a number of ways: They enable the windows to be slightly open allowing fresh air to circulate even when it is raining outside without the water coming in, also they provide ventilation and help to draw out smells from food, pets and smoke when on the move. For vehicles fitted with tinted windows they reduce glare when the windows are partially open and significantly reduce wind noise while driving with the windows down.

Terrafirma Wind Deflectors are smoke tinted and easy to fit, in most cases no tools or additional adhesive is required. For all models they are supplied with self-adhesive strips pre-fitted for easy application to the door frame.

Wheel Spacers

Terrafirma 30mm alloy wheel spacers give an additional 60mm track width to all Land Rovers. The benefits are improved handling, cornering and stability as well as increased steering lock.

The opportunity to fit larger tyres due to the increased steering lock is a bonus not to mention the improved 'stocky or more planted' look to the vehicle. These spacers are made from billet aluminium to the highest standards with high tensile studs and include a complete set of wheel nuts to ensure they are secured correctly.

Winching & Recovery Equipment

Winch & Accessories

A1200 Electric Winch – TF3301

The A12000 incorporates all the features requested by commercial users, as well as recreational & competition off roaders. The new Terrafirma winch combines 12000lb of pulling performance and modern styling with high quality synthetic rope and wireless remote control as well as the standard cable remote.

A powerful 6hp 12v motor and low noise 3 stage planetary gearbox produces 12000lbs of power pulled through a silver-grey synthetic rope and rated safety hook, of course with the synthetic rope comes a cool black alloy hawse fairlead. The winch is designed with a modern look and finished in stealthy matt black with matching compact solenoid pack with 2 green LEDs to indicate 'winch live' and ready for work. The solenoid pack has the added benefit of being able to be mounted in multiple mounting positions. The Terrafirma A12000 winch is built on the standard frame size of 10x4.5" to allow fitment to most popular mounts and bumpers.

Synthetic Rope – TF3302

Synthetic Rope 11x24m silver grey

12 V Key Operated Battery Cut-out Switch – GE001

Battery cut out switch, to enable you to disconnect the battery without having to remove any cables.

Aluminium Hawse Fairlead – TF3303

Aluminium Hawse, in black to fit any winch set up that you've got

- TF3304** Bow Shackle 4.75 22m Pin
- TF3305** Snatch Block In Red With Grease Fittig
- TF3306** Replacement Solenoid Box For Terrafirma Winch
- TF3307** Replacement Wireless Remote Control For Terrafirma Winch
- TF3308** Replacement Remote Control For Terrafirma Winch
- TF3309** Extended 4M Winch Cables & Isolator Switch
- RSSB16** 16000 Lb 3 3/4" Diameter Sheave Medium Duty

Recovery Equipment

Recovery Rope – TF3311

This super flexible easy to handle 9m long, 22mm diameter double braided nylon rope is the most advanced snatch recovery rope on the 4x4 market.

Bright red UV, water and abrasion resistant with black nylon reinforced eyes, this rope comes in a mesh storage bag for easy cleaning and has a whopping 13000kg load rating.

30% stretch with quick recovery makes this one of the most effective kinetic or snatch recovery ropes for off road 4x4 vehicle

Recovery Gloves – TF3312 L/M

Terrafirma recovery gloves are manufactured tough to handle the rigours of handling 4x4 winching and recovery equipment but also supple enough to be used for general tasks to protect and keep your hands clean. TF3312L for large, TF3312M for medium

Soft Shackle – TF3310

Soft shackles are safer, lighter-weight and more manageable than metal alternatives when towing or winching and are fast becoming the preferred choice in recreational and competition off-roading. These shackles are made of 11mm synthetic rope and rated to 9 tonnes of load.

Snatch Ring– TF3314

Our TerraFirma RED Winch Snatch Ring offers a strong, lightweight and safe alternative to the traditional metal snatch block. The Snatch Ring fits perfectly into a pocket or glove box, this makes it an ideal accessory to have in your truck for overloading expeditions or in competition when your co-driver is overlanding.

Recovery Straps

Recovery straps of varying lengths are a vital part of any off-roader's kit. Terrafirma recovery straps will suit all recovery situations

Terrafirma recovery straps all come with reinforced eyes and are sleeved to protect the stitching. The capacity and length of each strap should be carefully considered when selecting to suit the weight of the vehicle and circumstances in which they are to be used.

Terrafirma tree straps are wider than other recovery straps, this is important to prevent ring barking or damage to trees when using them as a suitable anchor point when winching. Tree straps are produced in a bright green colour to clearly identify them from other recovery straps.

Terrafirma extension straps can be used for towing but as they do not stretch, they give a hard connection between the two vehicles, the most suitable and common use is to extend the length of the winch cable in situations when the recovery vehicle or the only tree in sight is out of reach. Terrafirma extension straps are made in bright purple to clearly distinguish them from other straps in your kit bag.

Terrafirma snatch straps are constructed from a complex bright orange material designed to stretch up to 20%, which when used to recover a stuck vehicle uses the kinetic energy stored in the strap under tension to help extract the vehicle from its bogged situation. A snatch strap should be used in all vehicle to vehicle recovery and towing situations as the stretch provides a much more forgiving and less jarring connection between the vehicles.

Tree Strap – TFTS5M

Terrafirma bright green Tree strap. 5m long and 80mm wide with a load rating of 12000kg

Winch Extension Strap – TFES11000

Terrafirma bright purple Winch Extension Strap. 20m long, 80mm wide with a load rating on 11000kg

Snatch Strap – TFSS11000

Terrafirma bright orange Snatch strap. 9m long, 80mm wide with a load rating of 11000kg

Lighting

Pair Of 125mm LED Spot Lights With Amber Filter- TF705

Kit includes Amber clip on filters, wiring kit & switch.

18In 10w x 16 Cree LED Light Bar- TF712

Emergency Rechargeable 100m light - TF715

The TF715 is a super handy lightweight, adjustable magnetic based, rechargeable work light with bright, medium and flash modes. Supplied with USB charge lead and cigar lighter plug.

Pair Of 5.5In Round Roadrunner driving lamps - GL014

Pair of round 5.5" Front Runner driving lamps to suit all vehicles.

Pair of 188mm round Sportsline Driving Lamps- GL001

Pair of round 188mm Sports line driving lamps to suit all vehicles.

Pre-Wired Accessory Lighting Fitting Kit Including 30Amp Relay- GL010

Pre-wired accessory lighting fitting kit, including 30amp relay, from Ring.

Single Round Adjustable Work Lamp C/W On off Switch- GL2001

Single, round lensed, adjustable work lamp with mounting bracket.

Bulbs

- GL1001** EEC Approved Spare Bulb Kit Containing The 5 Most Popular Bulbs - C047
- GL1002** Pair H4 12342 VP High Performance Bulbs Giving 60% More Light
- GL1003** 12V H3 Bulb For GWL001 & GWL002 - All Vehicles
- GL1004** Pair of H4 Xenon Max Bulbs Giving Up To 90% More Light - All Vehicles
- GL1006** Pair Of H7 Xenon Max Bulbs Giving Up To 90% More Light - All Vehicles

NEOLUX OSRAM

WILDERNESS LIGHTING

Wilderness Lighting supply what are believed to be some of the highest quality & brightest LED lights on the market today using class leading technology.

The unbeatable toughness & durability of Wilderness lights means they are ideally suited for the most of extreme conditions including Agriculture, Mining, Forestry, Marine & Extreme off-road motorsport. Whatever application the lights are used for they will not let you down!

Compact 8 LED Lights – TF716

Our Compact 8 LED Spot Lights are small yet very powerful, these lights produce a massive 3000 Lumens of light.

20" Solo Single Row Combination Beam LED Light Bar– TF717

These small yet very powerful lights produce a massive 10780 Lumens of light from 20 x 5 watt OSLOM white LED chips giving visible beam distance of 1210m. 12.m

50" Solo Single Row Combination Beam LED Light Bar– TF718

These small yet very powerful lights produce a massive 10780 Lumens of light from 20 x 5 watt OSLOM white LED chips giving visible beam distance of 1210m.

Pair Of Bottom Mounting Brackets For Wilderness Light Bar– TF718A

These small yet very powerful lights produce a massive 10780 Lumens of light from 20 x 5 watt OSLOM white LED chips giving visible beam distance of 1210m.

Scene Down Lighter LED Work Light– TF719

Down Lighter Scene light produces a 65 degree spread of light to give you extra illumination when needed. The tough alloy housing can be mounted to virtually any surface to allow the light to be projected towards the target area.

Expedition

All you need to equip your Pick-Up for an adventure

Firetool Portable Fire Extinguisher – TFJE50

The world's most compact and versatile fire extinguisher. Perfect for Pick-Up vehicles of all types whatever your use and activity and suitable for extinguishing rubbish fires, cooker fires, foam and fabric, engine bay and electrical fires.

8L Oil Drainage Container– TFODC08L

Handy for using both away from home or for those who like to work on their own vehicles. Can be used for any oil/fluids.

Odyssey Battery– PC1500DT

ODYSSEY batteries deliver the massive starting power, rapid recovery, and amazing deep cycling capability that today's vehicles demand.

Ratchet Cargo Strap 4.5M– TF3313

Sand Tracks– TF888

These are 1.5mm long and 4mm thick perforated high grade aluminium sand tracks are perfect for preventing your vehicle sinking when crossing soft ground and sand. They are ridged for strength and perforated for traction.

Perfect for your overland adventure or desert crossing.

Jerry Cans

A Jerry can is a robust fuel container originally made from pressed steel and designed in Germany in the 1930s for military use to hold 20 litres of fuel.

The stamped indentations on the sides serve two purposes: firstly, to stiffen the sheet metal sides and secondly to allow greater surface area for expansion and contraction of the contents with heat and cold.

Original applications were denoted by the colour of the can although this has largely been ignored in recent times. Jerry cans are available in 5, 10 and 20litre capacity and accessories include a selection of spouts and holders that can be bolted together or attached to the vehicles structure.

- GE005** 5 Litre Green Jerry Can
- GE1010** 10 Litre Green Jerry Can
- GE020G** 20 Litre Green Jerry Can
- GE1020R** 20 Litre Red Jerry Can

Jerry Can Accessories

- GE1001** Fixed Jerry Can Spout For All Jerry Cans (Green)
- GE1002** Plastic Nozzled Semi Flexible Jerry Can Spout (Green)
- GE1003** Jerry Can Carrier for 20L Jerry Can
- GE1004** Jerry Can Carrier for 10L Jerry Can
- GE1007** Long Flexible Steel Jerry Can Spout For All Jerry Cans (Green)
- GE1099** Rubber Seal For All Jerry Cans

Fridge & Accessories

Portable Fridge Freezer – TFFR01

The Terrafirma fridge freezer is specially designed to operate in tough 4x4 and off road environments. Vibration resistant this fridge freezer is suitable for everything from weekend camping trips right through to full blown expeditions. Fisherman and medical organisations alike will also find the Terrafirma fridge freezer invaluable, able to perform even at +50deg. ambient temperature outside freezing down to -18deg. The capacity is a popular 45 litres with dual compartments providing ample storage space for fresh and frozen produce and of course a few cold tins of drink.

The unique full surround static coil evaporator and easy to clean stainless steel liner ensures optimum cooling performance with a low average current draw of 1.65amps with the freezer set to -10deg. at +32deg. ambient.

The Terrafirma fridge freezer works in 12 and 24 volt applications and a 240v adaptor is available for use at home The sturdy fully insulated cabinet incorporates a removable and reversible lid for ease of access and, to protect the fridge and add additional insulation, a snug-fitting protection jacket is available as an optional extra.

12/240 Volt Adaptor – TFFR02

Fridge Protection Jacket – TFFR03

Jacks

The Hi-Lift Jack Company offers the only all-cast jack manufactured in the world today. Our casting jack is manufactured from high yield and tensile strength iron castings, the same durable metal that we have used for over 100 years

- All-Cast Construction.
- 7000lb (3175.14kg) Tested Capacity.
- Lifts, Winches, Clamps, & More.
- Most Durable Design.

Hi-Lift 4ft Red Jack – GHL4

Hi-Lift 5ft Red Jack – GHL5

To stop your Hi-Lift Jack handle from rattling around or moving during transportation, this handy Handle Keeper is the perfect solution., it's made from tough, durable black Polyurethane

Hi-Lift Jack Handle Keeper Black - GHL6

Hi-Lift Jack Handle Keeper Red – GHL7

Hi-Lift Adaptor – GHL4/5A

This adaptor is suitable for the GHL4 and GHL5 Hi-Lift Jacks.

This adaptor slides over and locks onto the foot of any Hi-Lift jack, allowing you to take advantage of pre-existing jacking holes on rock sliders and aftermarket bumpers.

Hi-Lift Stowage Bag – GHL4/5BAG

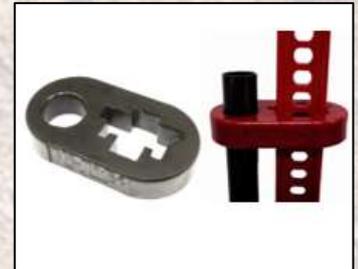

This bag is suitable for the GHL4 and GHL5 Hi-Lift Jacks.

The Hi-Lift Jacks are a durable product, but this Hi-Lift bag will help to protect it from the elements and ensure it works when you really need it too

Roof Bumper Or Any Flat Surface Mounting Kit for All Hi-Lift Jacks– GHL2

The Hi-Lift is designed for serious Off-Roaders who're looking for an easy and inexpensive way to safely store their Hi-Lift jack in a convenient and secure location.

- 1/8" steel construction holds up under the strain of off-road travel
- A padlock can be placed through a hole in the carriage bolt
- All mounting hardware and instructions are included, and some drilling is required
- Mounting brackets are slotted for adjustment
- Velcro handle strap secures handle to jack bar

Lockable Truck Bed Or Any Flat Surface Mounting Kit For All Hi-Lift Jacks- GHL3

Conveniently mount and lock your Hi-Lift Jack into place on the bedrail of your pickup.

It can be mounted horizontally or vertically, with or without a Jack Protector.

Designed to fit the bedrail of most pickups.

Drawer Set

Universal Rear Drawer set – TF6150

If you're looking for flexible, heavy duty premium quality storage solutions for your pickup then look no further than Terraforma's premium quality TF6150 drawer system, perfect storage system for your work horse, vacation or day to day pickup activities. Our drawer systems are designed to fit the most popular pickups so long as you have the correct bed space to fit them. With two separate carpet lined pull out lockable draws measuring 130cm x 40cm x 17cm internally and a large carpet lined top load area.

Our tough, secure and stylish carpet topped drawer systems provide a complete storage solution. They are produced to the highest standard with outstanding build quality

Miscellaneous

Land Meter Dashboard Inclinometer With Climb

Descent & Slope – GE2001

This dash mounted meter shows both the:

- Angle of Climb
- Angle of Descent
- Angle of Side Sloping

You can set your indicators to show the maximum angle the vehicle has achieved or more likely the point at which your nerves got the better of you! This inclinometer is mounted with double sided tape so no screws are required and includes wiring for back lighting.

Digital Wireless Reversing Camera

– TF935

- 4.3" colour TFT monitor
- 1/4" Colour CMOS image sensor
- Digital wireless video
- Suction cup mounting bracket
- Camera bracket
- 12/24V cigarette plug power cable (8-30V DC)
- Parking guidelines
- Optional second camera (sold separately)
- 6 x Infra-red LED night vision
- Camera power is taken from reverse lights on vehicle.

Bluetooth Remote Tyre Pressure Monitor Kit – TF308

A universal, easy to fit tyre pressure monitoring system that displays all your tyre information on your smart phone. Simply download the App, screw the TPMS valve caps onto all 4 wheel valve stems and follow the step by step instructions to pair the TPMS valve caps with your phone via Bluetooth. Multiple display screens show everything you need to know about your tyre performance to keep you driving safely. Alarms bring to your attention, fast leaks, slow leaks, high pressure and low pressure even no signal and low battery alarms identify when a TPMS valve cap has stopped transmitting.

Magnetic Finger – TF400

The powerful magnet on your fingertip allows you to hold or retrieve any small ferrous metal object with precise control. Ideal for use in tight spots and hard to reach places - and when you can't afford to drop it..

[Click here to see the Magnetic Finger in action](#)

Terrafirma products are warranted free from defects in materials and workmanship for a period of 1 year (12 months) from the date of retail invoice.

Terrafirma does not warrant that the products manufactured or marketed by it comply with the laws of the country where those goods are purchased or used. It is the sole responsibility of the purchaser to ascertain whether products being purchased, or the fitting of those products to any other object, comply with local laws.

This warranty covers structural defect and workmanship but does not cover finishes, labour charges for removal or refitting, freight costs, accident damage, misuse or abuse, damage due to incorrect or improper fitment or application, modified product, faulty design or consequential damage of any kind.

Damage or defects caused by collision, alteration, improper installation, road hazards, adverse conditions or usage for any other purpose other than normal private usage are not covered by this warranty.

Terrafirma shall not be liable for any other claim relating to the use of the product and any indirect special or consequential damage or injury to any person, company or other entity.

All claims must be accompanied by the original retail invoice. This warranty covers only the replacement of the product or part concerned. The decision remains solely at the discretion of Allmakes 4x4 Ltd.

The information contained in this catalogue was correct at the time of going to press. Allmakes/Terrafirma and its associated companies reserve the right to alter the range and any product specifications without notice. Always consult your Allmakes/Terrafirma distributor for the latest product information and specifications.

The Terrafirma range of products is constantly being evaluated for enhancement and improvement to make sure the level of quality and performance is as expected. Pictures and descriptions in this catalogue should be used for reference and are intended as a guide to the style, type and colour of product you have selected.
